Election/Restrictions

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 1-6 drawn to apparatus for an office furniture system, classified in class 312.

II. Claims 7-17, drawn to apparatus of a spill tolerant electrical outlet, classified in class 174.

The inventions I and II are related as a combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. In this instant case, the combination as claimed does not require the particulars of the subcombination as claimed because an office furniture system including panels could be alternatively made with a plurality of grooves surround opening for power outlet. Therefore, spill fluid could be stopped at grooves.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to request an oral election on 1/3/2007, but did not result in an election being made.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Chi Q. Nguyen whose telephone number is (571) 272-6847. The examiner can normally be reached on Monday-Friday from 7:30 am-4:00 pm.

If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Naoko Slack can be reached at (571) 272-6848.
